Terms and conditions and cost implications may apply. Our terms can be found at www.globaltelemetrics.eu/terms. If you require a copy of the terms and conditions please contact customer services on 0845 833 6971. All operations are dependent upon vehicle usage, a suitably charged vehicle battery, GPRS/GSM coverage, internet connections and product capabilities.

Product specification and information correct at the time of press.

Free Android/Apple Global Telemetrics app for use with all the devices within this brochure

SmarTrack Fleet

Smartrack Fleet offers the latest in fleet management services giving you the ability to monitor your own vehicles. This system allows you to track your assets with added features.

The website benefits from:

Driving Style - SmarTrack fleet devices send driving style information through to the website to help view how your vehicles are being driven.

FNOL - The G sensor within the device sends information to the website if the vehicle has been involved in an impact.

Multi Geo-Fence - Smartrack Fleet offers an unlimited geo-fence capability. The system allows you to create virtual perimeter(s) around locations. These geo-fences can be labelled to allow easy identification. An email can be sent if the vehicle enters or exits these areas.

Reports - Offers multiple reports giving you a variety of information including journey, timesheet and all activity data.

Multiple Logins - Multiple logins allows selectable access for users. Additional email addresses will be required to allow setup.

Street Mapping - Street view level mapping via Premium Google Maps.

Speed Warnings - Set your own ideal speed limit - if the vehicle travels above the set speed then you will receive an email.

Vehicle Grouping - Group vehicles together to help organise your fleet.

Business and Private Mileage - Allows specific times to be set when you would like to filter journey data.

Icons - Variety of vehicle icons available for grouping and easy identification.
